DETAILED ACTION

Applicant's Election in Paper # 10, filed 6/13/03 has been acknowledged. This restriction has been withdrawn. A new restriction requirement is detailed below:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 28, drawn to an assembly for packaging and cooling a microprocessor, classified in class 174, subclass 1+.
- II. Claims 29 and 30, drawn to a method for increasing the immunity of a microprocessor with a gasket from ESD events, classified in class 438, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case instead of mounting the microprocessor first, then the heat spreader, it can be performed by first mounting the heat spreader and then the micoprocessor.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2826

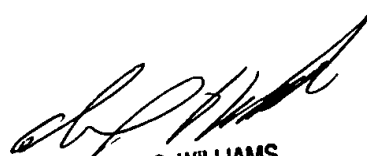

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
